## Section I: Introduction

### 1 A history of research in *Compositae*: early beginnings to the Reading Meeting (1975)

<i>J. Mauricio Bonifacino, Harold Robinson, Vicki A. Funk, Hans Walter Lack, Gerhard Wagenitz, Christian Feuillet and D.J. Nicholas Hind</i> . . . . .	3
Introduction . . . . .	3
Pre-Tournefort era . . . . .	3
Joseph Pitton de Tournefort (1656–1708) . . . . .	5
Sébastien Vaillant (1669–1722) . . . . .	6
Johannes Le Francq van Berkhey (1729–1812) . . . . .	7
Alexandre-Henri-Gabriel de Cassini (1781–1832) . . . . .	9
Christian Friedrich Lessing (1809–1862) . . . . .	14
Carl (Karl) Heinrich Schultz Bipontinus (1805–1867) . . . . .	17
George Bentham (1800–1884) . . . . .	19
Karl August Hoffmann (1853–1909) . . . . .	22
Benjamin Lincoln Robinson (1864–1935) . . . . .	22
James Small (1889–1955) . . . . .	25
Sidney Fay Blake (1892–1959) . . . . .	26
Hermann Merxmüller (1920–1988) . . . . .	27
José Cuatrecasas Arumí (1903–1996) . . . . .	29
Ángel Lulio Cabrera (1908–1999) . . . . .	31
Arthur Cronquist (1919–1992) . . . . .	33
The late 20 <sup>th</sup> and early 21 <sup>st</sup> century . . . . .	34

<b>2</b>	<b>The recent history of Compositae systematics: from daisies to deep achenes, sister groups and metatrees</b>	
	<i>Vernon H. Heywood</i> . . . . .	39
	Introduction . . . . .	39
	The situation in 1975. . . . .	39
	Recent milestones in Compositae classification and phylogeny. . . . .	40
	Revolutions in taxonomy and systematics. . . . .	41
	So where are we now?. . . . .	42
	Looking to the future . . . . .	43
<b>3</b>	<b>Economic importance of Compositae</b>	
	<i>Beryl B. Simpson</i> . . . . .	45
	Introduction . . . . .	45
	Edible crops . . . . .	45
	Non-food crops. . . . .	53
	Conclusions. . . . .	57
 <b>Section II: Character evolution at the family level</b>		
<b>4</b>	<b>A review of chromosome numbers in Asteraceae with hypotheses on chromosomal base number evolution</b>	
	<i>John C. Semple and Kuniaki Watanabe</i> . . . . .	61
	Introduction . . . . .	61
	Materials and methods. . . . .	62
	Results and discussion . . . . .	62
<b>5</b>	<b>Secondary chemistry of Compositae</b>	
	<i>Lalita M. Calabria, Vicente P. Emerenciano, Marcus T. Scotti and Tom J. Mabry</i> . . . . .	73
	Introduction . . . . .	73
	Materials and methods. . . . .	75
	Results and discussion . . . . .	76
	Conclusions. . . . .	86
<b>6</b>	<b>An introduction to micro-characters of Compositae</b>	
	<i>Harold Robinson</i> . . . . .	89
	Introduction . . . . .	89
	A survey of some characters. . . . .	90
	Examples of micro-character application . . . . .	99
	Some axioms regarding the use of micro-characters. . . . .	99
<b>7</b>	<b>Evolution of pollen in Compositae</b>	
	<i>Stephen Blackmore, Alexandra H. Wortley, John J. Skvarla and Harold Robinson</i> . . . . .	101
	Introduction . . . . .	101
	Materials and methods. . . . .	103
	Results. . . . .	106
	Evolution of pollen morphology based on the Compositae supertree. . . . .	106
	Evolution of pollen morphology in exemplar tribes. . . . .	112

Discussion . . . . .	115
Conclusions. . . . .	118
Appendix 7.1. Characters examined. . . . .	121
Appendix 7.2. Matrix of pollen morphological characters for supertree taxa, using tribes as terminals . . . . .	123
Appendix 7.3. Pollen descriptions for tribes of Compositae . . . . .	126
<b>8 Evolution of Compositae flowers</b>	
<i>Charles Jeffrey</i> . . . . .	131
Introduction . . . . .	131
Capitulum. . . . .	131
Receptacle. . . . .	132
Achenes. . . . .	132
Anthers . . . . .	133
Breeding system . . . . .	133
Florets. . . . .	133
Pollination . . . . .	134
Neoteny and evolution of the capitulum . . . . .	134
Secondary pollen presentation . . . . .	135
Dispersal, germination and establishment . . . . .	135
Summary and conclusion. . . . .	135
<b>9 Genetic diversity in Asteraceae endemic to oceanic islands: Baker's Law and polyploidy</b>	
<i>Daniel J. Crawford, Timothy K. Lowrey, Gregory J. Anderson, Gabriel Bernardello, Arnoldo Santos-Guerra and Tod F. Stuessy</i> . . . . .	139
Introduction . . . . .	139
Breeding system of colonizers. . . . .	139
Polyploid colonizers . . . . .	141
Materials and methods. . . . .	141
Selection of archipelagos and plants . . . . .	141
Chromosome numbers and polyploidy . . . . .	141
Breeding systems . . . . .	142
Results and discussion . . . . .	142
Chromosome numbers and polyploidy in endemic island lineages. . . . .	142
The significance of polyploid colonizers in the evolution of insular lineages . . . . .	142
Sporophytic self-incompatibility and pseudo-self-fertility: general considerations . . . . .	145
Breeding systems in colonizers of oceanic archipelagos . . . . .	146
Summary and conclusions . . . . .	147
 <b>Section III: Phylogeny, classification, and biogeography of the tribes</b>	
<b>Part 1: Asterales</b>	
<b>10 Asteraceae and relationships within Asterales</b>	
<i>Johannes Lundberg</i> . . . . .	157
The search for the sister of Asteraceae . . . . .	157
Plesiomorphic Asteraceae . . . . .	157
Calyceraceae and Asteraceae . . . . .	161
Goodeniaceae, Calyceraceae and Asteraceae . . . . .	161
The MGCA clade: Menyanthaceae, Goodeniaceae, Calyceraceae and Asteraceae . . . . .	161
The Core Asterales clade: MGCA, Stylidiaceae and APA. . . . .	164

Stylidiaceae . . . . .	164
The APA clade: Alseuosmiaceae, Phellinaceae and Argophyllaceae . . . . .	165
Pentaphragmataceae . . . . .	165
The basal division: Campanulaceae and Rouseaceae . . . . .	166

## 11 Classification of Compositae

<i>Vicki A. Funk, Alfonso Susanna, Tod F. Stuessy and Harold Robinson</i> . . . . .	171
Introduction . . . . .	171
Compositae Giseke (1792) [Asteraceae Martynov (1820)] . . . . .	173
Family description . . . . .	173
Current classification . . . . .	176

## Part 2: Basal clades

### 12 The basal grade of Compositae: Mutisieae (sensu Cabrera) and Carduoideae

<i>Santiago Ortiz, J. Mauricio Bonifacino, Jorge V. Crisci, Vicki A. Funk, Hans V. Hansen, D. J. Nicholas Hind, Liliana Katinas, Nádía Roque, Gisela Sancho, Alfonso Susanna and María Cristina Tellería</i> . . . . .	193
Introduction . . . . .	193
Mutisieae (sensu Cabrera 1977) . . . . .	194
Orphan Clades . . . . .	195
<i>Catamixis</i> incertae sedis . . . . .	208
Subfamily Carduoideae Cass. ex Sweet (1826) . . . . .	210
Conclusion . . . . .	212

### 13 Barnadesieae (Barnadesioideae)

<i>Tod F. Stuessy, Estrella Urtubey and Michael Gruenstaedl</i> . . . . .	215
Introduction . . . . .	215
Historical overview . . . . .	216
Description of subfamily . . . . .	216
Morphology and anatomy . . . . .	217
Pollen . . . . .	221
Chromosome numbers . . . . .	222
Chemistry . . . . .	222
Phylogenetic relationships . . . . .	222
Biogeography . . . . .	223
Evolution . . . . .	225
Economic uses . . . . .	226

### 14 Mutisieae sensu stricto (Mutisioideae sensu stricto)

<i>Liliana Katinas, Gisela Sancho, María Cristina Tellería and Jorge V. Crisci</i> . . . . .	229
Introduction . . . . .	229
Historical overview . . . . .	230
Systematics . . . . .	236
Morphology . . . . .	238
Floral biology and pollination . . . . .	242
Biogeography . . . . .	243
Adaptation to dry environments . . . . .	243
Fossil pollen and early evolution . . . . .	244

**15 Gochnatieae (Gochnatioideae) and Hyalideae (Wunderlichioideae p.p.)**

<i>Gisela Sancho and Susana E. Freire</i> . . . . .	249
Historical overview . . . . .	249
Phylogeny . . . . .	249
Tribe Gochnatieae . . . . .	250
Taxonomy and biogeography . . . . .	250
Morphology . . . . .	252
Pollen . . . . .	256
Chromosome number . . . . .	256
Chemistry . . . . .	256
Floral biology . . . . .	256
Economic uses . . . . .	256
Tribe Hyalideae . . . . .	256
Taxonomy and biogeography . . . . .	256
Morphology . . . . .	257
Pollen . . . . .	258
Chromosome number . . . . .	258
Chemistry . . . . .	258
Discussion and conclusion . . . . .	258

**16 Hecastocleideae (Hecastocleidoideae)**

<i>Vicki A. Funk and D. J. Nicholas Hind</i> . . . . .	261
Historical overview and morphology . . . . .	261
Phylogeny . . . . .	261
Taxonomy . . . . .	261
Pollen . . . . .	263
Chromosome number . . . . .	264
Chemistry . . . . .	264
Biogeography . . . . .	264
Biology, ecology, ethnobotany . . . . .	264

**17 Dicomeae (Carduoideae)**

<i>Santiago Ortiz, Rodrigo Carbajal, Miguel Serrano and Antonio X.P. Coutinho</i> . . . . .	267
Historical overview . . . . .	267
Phylogeny . . . . .	268
Taxonomy . . . . .	269
Morphology . . . . .	274
Pollen . . . . .	274
Chromosome numbers . . . . .	276
Chemistry . . . . .	276
Ecology . . . . .	276
Biogeography . . . . .	276
Evolution . . . . .	276
Ethnobotany . . . . .	277

**18 Tarchonantheae (Carduoideae)**

<i>Santiago Ortiz</i> . . . . .	279
Historical overview . . . . .	279
Phylogeny . . . . .	279
Taxonomy . . . . .	280

Morphology . . . . .	283
Pollen . . . . .	283
Chromosome numbers . . . . .	283
Chemistry . . . . .	283
Ecology . . . . .	283
Biogeography . . . . .	283
Ethnobotany . . . . .	284
<b>19 Oldenburgieae (Carduoideae)</b>	
<i>Santiago Ortiz</i> . . . . .	287
Historical overview . . . . .	287
Phylogeny . . . . .	287
Taxonomy . . . . .	288
Morphology . . . . .	288
Pollen . . . . .	290
Chromosome numbers . . . . .	290
Chemistry . . . . .	290
Ecology . . . . .	290
Biogeography . . . . .	290
<b>20 Cardueae (Carduoideae)</b>	
<i>Alfonso Susanna and Núria Garcia-Jacas</i> . . . . .	293
Historical overview . . . . .	293
Phylogeny . . . . .	294
Taxonomy . . . . .	294
Subtribal classification . . . . .	296
Chemistry . . . . .	309
Biogeography . . . . .	309
Origin and age . . . . .	311
Economic uses . . . . .	311
<b>21 Pertyeae (Pertyoideae)</b>	
<i>Susana E. Freire</i> . . . . .	315
Historical overview . . . . .	315
Phylogeny . . . . .	315
Taxonomy . . . . .	315
Morphology and anatomy . . . . .	316
Pollen . . . . .	321
Chromosome numbers . . . . .	321
Hybridization . . . . .	321
Ecology and floral biology . . . . .	321
Biogeography and evolution . . . . .	321
Ethnobotany . . . . .	324
Appendix 21.1. List of the taxa of Pertyeae and their distribution . . . . .	325
<b>22 Gymnarrheneae (Gymnarrhenoideae)</b>	
<i>Vicki A. Funk and Ori Fragman-Sapir</i> . . . . .	327
Introduction . . . . .	327
Historical overview . . . . .	327
Phylogeny . . . . .	327

Taxonomy . . . . .	329
Morphology . . . . .	329
Anatomy . . . . .	329
Pollen . . . . .	329
Chromosome numbers . . . . .	330
Chemistry . . . . .	330
Ecology and reproductive biology . . . . .	330
Applied aspects . . . . .	331

### Part 3: Cichorioideae and Corymbioideae

#### 23 Introduction to Cichorioideae

<i>Vicki A. Funk and Raymund Chan . . . . .</i>	335
---	-----

Introduction . . . . .	335
Molecular phylogenetic analysis. . . . .	336
Phylogeny . . . . .	337
Taxonomy . . . . .	339
Chromosome numbers . . . . .	340
Chemistry . . . . .	340
Biogeography . . . . .	340
Placement of problematic genera . . . . .	340

#### 24 Cichorieae

<i>Norbert Kilian, Birgit Gemeinholzer and Hans Walter Lack . . . . .</i>	343
---	-----

Introduction . . . . .	343
Historical overview. . . . .	343
Phylogeny . . . . .	346
Taxonomy . . . . .	354
Morphology and anatomy . . . . .	355
Chromosome numbers . . . . .	367
Chemistry . . . . .	368
Biogeography . . . . .	368
Evolution . . . . .	372
Economic uses. . . . .	373
Appendix 24.1. Subtribal classification of Cichorieae . . . . .	380

#### 25 Arctotideae

<i>Per Ola Karis, Vicki A. Funk, Robert J. McKenzie, Nigel P. Barker and Raymund Chan . . . . .</i>	385
---	-----

Historical overview. . . . .	385
Phylogeny . . . . .	386
Subtribal treatments . . . . .	388
Arctotidinae . . . . .	388
Taxonomy . . . . .	388
Morphology . . . . .	388
Pollen. . . . .	393
Chromosome numbers . . . . .	393
Chemistry . . . . .	394
Ecology . . . . .	394
Biogeography . . . . .	394
Economic uses . . . . .	395
Invasives. . . . .	395

Gorteriinae . . . . .	395
Taxonomy . . . . .	395
Morphology . . . . .	397
Pollen . . . . .	401
Chromosome numbers . . . . .	403
Chemistry . . . . .	405
Ecology . . . . .	405
Biogeography . . . . .	406
Economic uses . . . . .	406
Invasives . . . . .	406
Character evolution . . . . .	407
Conclusion . . . . .	408
<b>26 Eremothamneae</b>	
<i>Harold Robinson and Vicki A. Funk</i> . . . . .	411
Historical overview and morphology . . . . .	411
Phylogeny . . . . .	415
Taxonomy . . . . .	415
Pollen . . . . .	416
Biogeography . . . . .	416
Chromosome numbers, chemistry, biology, ecology, ethnobotany . . . . .	416
<b>27 Liabeae</b>	
<i>Michael O. Dillon, Vicki A. Funk, Harold Robinson and Raymund Chan</i> . . . . .	417
Historical overview . . . . .	417
Distribution and diversity . . . . .	418
Phylogeny and systematics . . . . .	422
Morphology and anatomy . . . . .	425
Pollen . . . . .	428
Chromosome numbers . . . . .	431
Biogeography . . . . .	433
Evolution . . . . .	434
Conclusions . . . . .	434
Appendix 27.1. Description of subtribe Sinclairiinae . . . . .	437
<b>28 Vernonieae</b>	
<i>Sterling C. Keeley and Harold Robinson</i> . . . . .	439
Historical overview . . . . .	439
Phylogeny . . . . .	440
Taxonomy . . . . .	447
Morphology and anatomy . . . . .	452
Pollen . . . . .	454
Chromosome numbers . . . . .	454
Chemistry . . . . .	456
Ecology . . . . .	456
Biogeography . . . . .	457
Evolution . . . . .	459
Weeds . . . . .	459
Ethnobotanical and medicinal uses . . . . .	460
Economic uses . . . . .	461

<b>29 Platycarpeae</b>	
<i>Vicki A. Funk, Marinda Koekemoer, Harold Robinson and John J. Skvarla</i> . . . . .	471
Historical overview . . . . .	471
Phylogeny . . . . .	471
Taxonomy . . . . .	471
Morphology . . . . .	473
Pollen . . . . .	473
Chromosome numbers . . . . .	475
Chemistry . . . . .	475
Biogeography . . . . .	475
Biology and ecology . . . . .	475
Ethnobotany . . . . .	475
<b>30 Moquinieae</b>	
<i>Harold Robinson</i> . . . . .	477
Historical overview . . . . .	477
Phylogeny . . . . .	477
Taxonomy . . . . .	477
Pollen . . . . .	479
Chemistry . . . . .	480
Biogeography . . . . .	481
<b>31 <i>Heterolepis</i>: an unplaced genus</b>	
<i>Vicki A. Funk and Per Ola Karis</i> . . . . .	483
Historical overview and morphology . . . . .	483
Phylogeny . . . . .	484
Taxonomy . . . . .	484
Pollen . . . . .	484
Chromosome numbers . . . . .	484
Chemistry . . . . .	484
Biogeography . . . . .	484
Ecology, conservation, horticulture . . . . .	485
<b>32 Corymbieae</b>	
<i>Bertil Nordenstam and Vicki A. Funk</i> . . . . .	487
Historical overview and tribal relationships . . . . .	487
Taxonomy . . . . .	487
Pollen . . . . .	488
